1. Identification of substance / mixture and of the company / undertaking

Relevant identified uses of the substance or mixture and uses advised against

Solution to clean

Details of the supplier of the safety data sheet

Savonnerie du Léman Christian Cottet
chemin de Prévenoge 2
1024 Ecublens
Tél: 021 691 39 34
e-mail: lesavonnier@yahoo.fr

Emergency telephone number

145 (CH)
+41 44-251-5151 (Tox-Center)

2. Hazards identification

WARNING DANGEROUS (SGH 07)
Can cause skin irritation, allergies, eczema or drowsiness. Possible intoxication from the first contact with the product.

DANGEROUS FOR HEALTH (SGH 08)
Can damage certain organs. May seriously damage to health, or immediate or long term, lead to cancer, damage to the genetic or affect fertility or development. Can be fatal if penetration into the airways.

DANGEROUS TO THE AQUATIC ENVIRONMENT (SGH 09)
Toxic to aquatic organisms, may cause long-term adverse effects in the aquatic environment.
Hazard statement(s)

H302: Harmful if swallowed.
H315: Causes skin irritation.
H413: May be harmful in the long term to aquatic organisms.

Precautionary statement(s)

P102: Keep out of reach of children.
P260: Do not breathe vapors.
P280: Wear protective gloves/protective clothing/equipment for eye protection/face protection.
P502: Refer to manufacturer / supplier for information about recovery / recycling.

3. Composition/information on ingredients

Chemical characteristics

4. First aid measures

General advise:
Subjects out of the danger zone.
Remove contaminated clothing immediately.
Medical supervision for at least 48 h.

If inhaled:
If breathed in, move subject into fresh air. If not breathing, give artificial respiration. Consult a physician.

In case of skin contact:
Wash off with plenty of water. Buffer with propyleneglycol 400. Consult a physician.

In case of eye contact:
Rinse thoroughly with plenty of water for at least 15 minutes and consult a physician.

If swallowed:
Rinse mouth and then drink plenty.
Administer activated charcoal and sodium sulfate.
In case of unconsciousness, lay down the subject in recovery position and call in emergency a physician.
**Indication of any immediate medical attention**

*The following symptoms may occur:*
- Mucosal irritation
- Respiratory tract irritation
- Sickliness
- Gastrointestinal disorders
- Dizziness
- Dyspnea
- Narcosis

**5. Firefighting measures**

**Extinguishing media:**
Use water spray, dry chemical or carbon dioxide. Adapt protective measures in the fight against the fire to environmental protection.

**Special hazards arising from the substance or mixture:**
Can be released in case of fire:
- Phosgene
- Hydrogen chloride
- Ammoniac
- Carbon monoxide
- Carbon dioxide
- Chlorine and chlorine compounds

**Protective equipment:**
Wear self-contained breathing apparatus of the ambient air. Wear total protection.

**Further information:**
Cool packaging by spraying with water.

**6. Accidental release measures**

**General measures:**
Do not let product enter drains. Discharge into the environment must be avoided.
Use absorbent and dispose of in accordance to Chapter 13.
Particular danger of slipping due to the presence of scattered or spilled product.
**Personal precautions, protective equipment and emergency procedures:**

Use personal protective equipment: gloves, boots, bound to protect the entire body resistant to oils and chlorinated solvents, respiratory protection.

**Environmental precautions:**

Absorb spilled material and remove the soiled absorbent under Chapter 13. Neutralization residue after absorption with an inorganic acid and dilute before discharge into the wastewater system.

**7. Handling and storage**

**Handling**

Precautions for handling:

Open and handle containers with care

**Protection against fire and explosion:**

The product is not flammable. However in case of overheating packaging containing the product or equipment, flammable gases may be released. Avoid sparks, flames, and the presence of glowing objects.

**Storage**

Requirements for storage rooms and vessels:

Store the containers in a cool, well-ventilated place.

Provide floors resistant to leaching.

**Information for common storage:**

Do not store with acids.

**Further information about storage conditions:**

Keep containers tightly closed.

Protect against freezing.

**8. Exposure controls/personal protection**

**Additional information about design of technical facilities:**

Use in well-ventilated area, or in a vacuum system with a condensing vapors (see point 7).

**Components with critical values that require monitoring at the workplace (Suva 2014)**

<table>
<thead>
<tr>
<th>Substance</th>
<th>Average value :</th>
<th>Limit value :</th>
</tr>
</thead>
<tbody>
<tr>
<td>Tétrachloroethylene</td>
<td>345 mg/m3, 50 ppm</td>
<td>690 mg/m3, 100 ppm</td>
</tr>
</tbody>
</table>
**Ethanol**

Average value: 960 mg/m³, 500 ppm

Limit value: 1920 mg/m³, 1000 ppm.

**Ammoniac**

Average value: 14 mg/m³, 20 ppm

Limit value: 28 mg/m³, 40 ppm.

**Additional information:**
This document builds on the lists valid at the time of its development.

**General protective and hygiene:**
Do not eat, drink or smoke in the workplace.
Keep away from foodstuffs, beverages and feed.
Wash hands before breaks and after work. Avoid contact with eyes and skin.
Provide shower and eye shower on the workplace.
Do not breathe vapors, gases and aerosols.

**Personal protective equipment:**

**Hands protection:** Alkaline liquids resistant gloves.
For permanent exposure gloves made of the following materials are suitable:
Chemical resistant gloves (EN374)

Gloves made of the following materials are not suitable:
Leather gloves.
Cloth gloves.

**Eyes protection:**
Goggles.

**Respiratory protection:**
In case of vapor / aerosol use a respirator. Gas filter A.

**Body protection:**
Resistant protective clothing to alkalis and solvents.

### 9. Physical and chemical properties

**General information**

- **Form:** liquid
- **Colour:** white-beige opaque
- **Odour:** alcohol-ammonia
**Change in condition**

- **Melting point:** no data available
- **Boiling point:** <100°C
- **Flash point:** no data available
- **Flammability (solid, gas):** easily flammable gas mixed with air
- **Auto-ignition:** >400 °C

**Explosive properties:** The product is not explosive

**Explosion limits:** no data available

**Vapour pressure at 20°C:** no data available

**Density at 20°C:** 0.981 g/cm³

**Solubility in water:** fully miscible

**Ph value at 20°C:** 9.5

### 10. Stability and reactivity

**Thermal decomposition / conditions to be avoided:**
No decomposition if used as directed.
To avoid thermal decomposition, do not overheat.

**Materials to avoid:** Strong acids

**Hazardous decomposition products:** refer to chapter 5

### 11. Toxicological information

**Acute toxicity:**

**LD / LC50 values relevant for classification:**

<table>
<thead>
<tr>
<th>Substance</th>
<th>Route</th>
<th>LD50 or LC50</th>

</table>

**Primary irritant effect:**

**skin:** irritation of the skin and mucous membranes. May defat the skin and cause irritation if prolonged or repeated use.
eyes: severe irritation.

Sensitization: no sensitizing effects known.

Subacute to chronic toxicity: carcinogenic potential.

Results on human:
Prolonged or repeated contact may cause dermatitis by removing the skin lipo-acid layer.
Prolonged and repeated exposure can be harmful to the liver and kidneys.

Additional toxicological information: danger by skin resorption.

12. Ecological information

Ecotoxicological effects:
The product is not readily biodegradable.

Mobility and bioaccumulation potential:
Given the distribution coefficient n-octanol / water an accumulation in aquatic organisms is likely.

Ecotoxicological effects, aquatic toxicity:
EC10/18h 45 mg/l (pseudomonas putida)
EC50/48h 22 mg/l (daphnia magna)

Remark:
The substance is harmful to aquatic organisms.

General information:
Do not allow undiluted product or large quantities of it to reach the ground water, water surface or drains.

13. Disposal considerations

Product - Recommendation:
Should not be disposed together with household garbage. Do not allow to enter drains.
Must be specially treated adhering to official regulations. Should not be mixed with other solvents / products for recycling.

Uncleaned packaging – Recommendation:
Packaging can be reused or recycled after cleaning.

Recommended cleansing:
Water, if necessary with cleaning products.
14. Transport information

Land transport ADR / RID and RTMDF / RTMDR (Ordinance on the transport of dangerous goods - road and rail) (cross-border / domestic):
ADR / RID-RTMDF / F (Ordinance on the transport of dangerous goods - road and rail)

No ONU - UN : 2810
Description of product : 2810 R.G.1
No ODS : 1230
No EGA : 47871

15. Regulatory information

This safety datasheet complies with the requirements of Regulation (CE) n° 1272/2008

Labelling according to EC Directives:
The product is classified and labeled in accordance with the guidelines of the European Community / the "GetStoffV" Ordinance on Hazardous Materials.

Code letter and hazard designation of product:

**CE-Symbol(s) of danger**
- WARNING DANGEROUS (SGH 07)
- DANGEROUS FOR HEALTH (SGH 08)
- DANGEROUS TO THE AQUATIC ENVIRONMENT (SGH 09)

**Phrase(s) of risk**
- H302 : Harmful if swallowed.
- H315 : Causes skin irritation.
- H413 : May be harmful in the long term to aquatic organisms.

**Phrase(s) of security**
- P102 : Keep out of reach of children.
- P260 : Do not breathe vapors.
- P280 : Wear protective gloves/protective clothing/equipment for eye protection/face protection.
- P502 : Refer to manufacturer / supplier for information about recovery / recycling.
Additional labeling:

Contain halogenated solvents:
Tetrachloroethylene  <3 %
No UN : 1897

16. Other information

The information contained in this safety data sheet are based on our knowledge to date. The information in this sheet must be regarded as a description of the safety requirements for the product, they should not be considered as a warranty or quality specification and have no contractual value of the properties thereof. The information contained in this safety data sheet relate to the specific material designated and may not be valid in the case of combination with another product or process, unless it is specified in the text of the paper product.

Recommended use

Restricted to professional users.

Text of H phrases mentioned in section 3

H225 : Highly flammable liquid and vapor.
H314 : Causes skin burns and serious eye damage.
H315 : Causes skin irritation.
H319 : Causes severe eye irritation.
H351 : Suspected of causing cancer.
H411 : Toxic to aquatic organisms, resulting in adverse long-term effects.

Other information

Read the instructions on the label.

Disclaimer of liability

The information contained in this safety data sheet has been prepared on the basis of our knowledge at the date of publication of this document.

Product standards according to REACH Article 31 of Regulation 1907/2006
